

INNOVATIVE WASTE

KAIKOURA

Asbestos

Acceptance Criteria & Instructions

All asbestos containing material must arrive onsite securely double wrapped in 200-micron plastic and be sealed in no greater than 1000 kg lots. Innovative Waste Kaitiaki will not accept any asbestos containing materials that do not meet the following requirements:

Polythene Sheeting

Asbestos sheeting, asbestos lagged pipes and similar long or large should be wrapped in new heavy duty 200 micro (minimum thickness) polythene sheeting. Once wrapped the bundles must be labelled to indicate the presence of Asbestos. Double wrap the polythene sheeting and ensure it is taped well.

Bundles have a maximum allowable weight of 1000 Kg. Any pallets brought into IWK site are to be left and have exchange pallets available.

Bags

Asbestos waste must be contained in double layer of new and heavy duty 200 micro (minimum thickness) polythene bags. The waste must be double bagged and closed with a goose neck tie. The bags should be not more than ½ full to reduce risk of bags tearing or splitting.

The bags must be clearly labeled with "Caution Asbestos – Do not open or damage bag. Do not inhale dust".

Drums

IWK do not accept Asbestos waste in drums.

There must be NO exposed asbestos product protruding from plastic bags or sheeting and the acceptable wrapping methods used as outlined above.

On- Site receiving Process

Asbestos is accepted between the hours 9am – 12pm and 1.00pm – 4.00pm Monday, Wednesday, Thursday and Friday only. Asbestos waste is not accepted on Saturday, Sunday or public holidays. All vehicles to be inspected and registered at the IWK weighbridge. Acceptable loads will then be allowed access to the asbestos storage area under IWK staff supervision.

Disposal Costs

Domestic and commercial – all vehicle types \$450.00 per ton (including GST), \$391.30 per ton + GST

Minimum charge \$10.00 (including GST)

Bags \$5 (including GST)
